M7U6: Managing a Successful Business Project

(Batch 19)

Assessment Brief

Qualification	BTEC HND in Business - Level 5
Assignment Title	Managing Talent Across Different Age Profiles
Module Leader	Udisha Rajapaksa
Issued Date	6 February 2026
Submission Date & Time	6 March 2026 – 10.00am

Learning Outcomes

By the end of this unit, a student will be able to,

- LO1:** Explain the key stages of the Project Life Cycle that should be considered when project managing.
- LO2:** Produce a Project Management Plan (PMP) for a business project using primary and secondary research methods.
- LO3:** Implement the Project Management Plan (PMP) to communicate results from the research and make conclusions from the evidence of findings.
- LO4:** Reflect on value gained from implementing the Project and the Project Management Process.

Project Theme: Talent Management

Overview of the Assessment

Talent Management (TM) is the process by which businesses and organisations recognise and develop talented people who can have a positive impact on their organisations and their productivity. It has not only become a key component of human resource management, but also the responsibility of leaders and managers at all levels to manage talent within the business, with TM strategies being developed in line with the particular needs and structure of the business and industry.

Themes of TM relevant to businesses when considering a strategic approach to talent management include the following:

- the role of line managers and leaders in employee development and well-being;
- talent management being used as a lever for culture change;
- the importance of contextualising approaches to talent management;
- the need for new and innovative ways of working to achieve a strategic approach to talent management;
- barriers for the development of a strategic approach caused by economic and day-to-day operational pressures.

Staff retention, training and morale are the key elements in any industry where talented motivated employees can help differentiate one organisation from another and influence business success. An increasing number of businesses are rethinking ways to get the most from their staff. Rising costs, recruitment difficulties and changing employee attitudes mean that, for many employers, the traditional approaches to recruiting, training and retaining staff are being revisited to harness and develop talent and ultimately drive competitive advantage.

Project Topic

How are companies responding to managing talent across different age profiles.

Project Task

Feasibility Research Study

A local organisation is experiencing challenges in managing a diverse workforce that spans multiple age profiles, including Baby Boomers, Millennials, Generation Z, Generation X. These challenges include differences in work expectations, communication styles, technology adoption, skill gaps, and retention issues.

To address these concerns and ensure sustainable organisational performance, you have been assigned to conduct a feasibility research study focused on how the HR Department can respond to generational diversity by adopting inclusive leadership practices, tailored talent management strategies, and age-responsive policies to effectively manage, engage, and develop talent across different age groups.

As part of this project, you are expected to deliver:

- (i) A comprehensive project management plan.
- (ii) Detailed research findings on generational workforce management
- (iii) A strategic talent management implementation plan addressing different age profiles.
- (iv) A final project report outlining conclusions and recommendations.

Project Guidance

Initiation: Initiate the project by developing a Project Management Plan (PMP) focused on managing talent across different age profiles by defining the project objectives, scope, stakeholders, and obtaining approval of the project charter.

Planning: Formulate detailed project plans to study generational workforce trends and key talent management practices such as recruitment, training, performance management, engagement, and retention across age groups.

Execution: Conduct research to explore how organisations manage multi-generational workforces and how leadership approaches support collaboration, knowledge sharing, and productivity.

Monitoring and Controlling: Monitor project progress, manage risks such as generational differences and resistance to change, and ensure research quality, timelines, and milestones are achieved.

Project Closure: Present the final project report with business level recommendations, a reflective statement and a project logbook documenting project activities and learning.

Word Count - 10000 Words

Learner Support

Apart from the regular lecture and interactive seminar sessions, you are encouraged to meet your tutor to discuss your progress in the preparation. You must produce two tutor feedback notes.

Learning Outcomes and Assessment Criteria

Pass	Merit	Distinction
LO1 Explain the key stages of the project lifecycle that should be considered when project managing		D1 Critically evaluate the project-management process.
P1 Explain the stages of the project lifecycle (PLC) and their importance to the success of a project. P2 Examine the factors to be considered when compiling a project management plan (PMP).	M1 Evaluate the stages of the PLC and the factors, (deliverables, quality, risk, communication and resources) to be considered in a PMP.	
LO2 Produce a Project Management Plan (PMP) for a business project using primary and secondary research methods		D2 Justify the choices made in the design of the PMP for completing the aims and objectives of the project.
P3 Examine a range of research methods and strategies and their importance for gathering information and data collection. P4 Produce a PMP that covers, aim, objectives, deliverables, quality, risk, communication resources and research methods. P5 Produce a work breakdown structure and a schedule to provide timeframes and stages for completion.	M2 Evaluate a range of research methods and strategies for gathering information and data collection M3 Produce a detailed PMP, and schedule for monitoring and completing the aims and objectives of the project.	
LO3 Implement the Project Management Plan (PMP) to communicate results from the research and make conclusions from the evidence of findings		LO3 and LO4 D3 Critically reflect on the findings from the research and the project management process in supporting stated objectives and own learning.
P6 Conduct a business project as stated within the PMP and communicate findings. P7 Present data to draw valid and meaningful conclusions and recommendations from data analysis.	M4 Justify conclusions and recommendations drawn from data analysis and findings to meet the stated project objectives.	
LO4 Reflect on value gained from implementing the project and the project management process.		
P8 Reflect on the value of undertaking the business project to meet stated objectives and own learning and performance.	M5 Evaluate the project management process to meet stated objectives and support own learning and performance.
