Learning Outcomes

By the end of this unit students will be able to:

LO1: Understand the approaches to leadership and management to meet organisational objectives

LO2: Apply theories of management and leadership to support teams in achieving goals

JENSEN HUANG: SUCCESS THROUGH INNOVATION AND VISION

Driven by innovation, resilience, and a vision for the future of technology, Jensen Huang has emerged as one of the most influential leaders in the global technology industry. As the co-founder and Chief Executive Officer of NVIDIA, he transformed the company from a graphics processing unit (GPU) manufacturer into a global leader in artificial intelligence and accelerated computing.

Huang is known for his consistency, discipline, and strong personal identity, often symbolised by his iconic black leather jacket. He emphasises the importance of intuition, curiosity, and conviction when leading in fast-changing technological environments, arguing that successful innovation requires leaders to anticipate future developments while managing long-term execution. Strategically, Huang focuses NVIDIA on high-value, innovation-driven fields that ensure that the organisation remains competitive in complex, high-growth industries rather than diluted in standardised markets. He also promotes first principles thinking, encouraging leaders to break down problems into fundamental truths when making decisions.

NVIDIA operates with a relatively flat organisational structure that reduces hierarchy and encourages employee responsibility. Jensen Huang supports decentralised decision-making and minimal bureaucracy, enabling faster responses and greater agility. Communication is maintained through a “Top Five Things” system, where employees share brief daily updates on key activities and insights. This approach allows Huang to monitor organisational performance in real time while reducing unnecessary administrative reporting.

He also rejects rigid long-term strategic planning, such as five-year plans, which he considers unsuitable for fast-moving industries. Instead, he promotes continuous planning, where strategies are constantly adjusted based on environmental changes. Huang places strong emphasis on transparency and open communication. He communicates decisions directly in group settings rather than through private discussions, ensuring that all employees receive the same information simultaneously. This prevents information silos and strengthens organisational alignment. He also encourages open feedback and is willing to refine strategies based on employee input, fostering a culture of trust and shared ownership.

Huang’s leadership approach elicits a strong focus on innovation, agility, transparency, and empowerment. His practices show how strategic focus can be aligned to sustain long-term success in a highly dynamic and competitive industry.

Learning Outcomes and Assessment Criteria

Learning Outcomes	Pass	Merit	Distinction
1. Understand the approaches to leadership and management to meet organisational objectives	1.1 Discuss different approaches to leadership and management to meet organisational objectives	1M1 Analyse different leadership and management performance and competences to meet organisation objectives	1D1 Recommend suitable leadership and management approaches in different organisational context to meet organisation objectives and achieve goals
2. Apply theories of management and leadership to support teams in achieving goals	2.1 Apply a range of management and leadership theories to creating teams for given organisation contexts	2M1 Compare the impact of different theories of management and leadership, and their impact in given organisation contexts
